RuffScore CARD - Instructions

Use flexible tape measure, cable, wire or string for measurements.

For Quick and Easy Score - Measure to the nearest 1/2 inch.

RuffScore Cards give you a Quick - Easy - Field Score that is close to the "Official" record book complex scoring.

Each purchase of a RuffScore Tag - allows you to

SUBMIT YOUR SCORE TO THE RUFFSCORE RECORD BOOK

Both Typical and Non-Typical scoring deducts differences between normal right and left side points. Symmetry = a higher score. Left side of card has boxes for Left and Right side measurements. Right side is for Net Score. Enter L+R Total or smaller x 2 as shown. Entering 2x smaller measurement is a quicker way to the Net Score.

- TP Count Normal (Typical) and Abnormal points starting with the Brow Tine or Eye Guard. Main Beam is the last point.
- AP Abnormal Points (or any point) must be one inch long to count. Choose only one - Typical or Non-Typical. Subtract or Add Total.
- NP Measure from top of beam to tip. Add length of all Normal Points on the side together and enter the total.
- MB Main Beam length is along the outer edge from Burr to tip.
- CB "Official" scoring measures four circumferences on each side. Add all 4 of these measurements: between Point 1 and Point 2, Point 2 and Point 3, Point 3 and Point 4, Point 4 and Point 5.
- IS Inside Spread has to be at a right angle to the skull center line. Cannot be diagonal. Length is limited to longest Main Beam.
